Solar YYC is a solar energy contractor based out of Calgary, Alberta. We design and install solar energy systems for all types of customer needs.

We have an opening for a **Solar Technician position**. Employment period is Spring to Fall 2018.

Solar Technicians install the majority of the solar system including racking feet, racking, and solar panels – generally on residential roofs. A Solar Technician will also need to assist the Master Electrician on site in the fulfilment of their duties.

The majority of work will be in Calgary with opportunities to travel Southern Alberta.

We are looking for energetic, self-starters, who are interested in a career in electrical and/or solar energy.

Solar is a growth industry and this is a fantastic opportunity for you to learn valuable skills.

Duties:

Installation of solar electric systems following SOP and safety protocols

Requirements:

- 1st or 2nd year electrical apprentice **OR** a student in an electrical centered discipline **OR** a strong desire to get started in a career in electrical and/or solar
- Ability to work comfortably at heights
- Ability to lift 40 lbs overhead
- Ability to work within a team
- Ability to get to and from different Calgary job sites (new site every 2-3 days)

Assets:

- Solar experience
- Solar training through an accredited program
- A working vehicle
- Fall protection training

We Provide:

- On site and in classroom training
- Competitive wages
- An ability to grow within a small company

Summer hours are guaranteed 30/week with possibilities to work up to 45 hours/week with Saturdays optional. Spring and fall hours can be part/full time depending on agreement

If you are interested, please send your resume to info@solaryyc.ca.
